

lec # 27.

Trees.

- 1- Connected
- 2- Undirected
- 3- No Simple Circuit

Ex 1:-
624

Rooted tree:-

Parent:-

Child:-

Ancestors:-

Descendants:-

Siblings:-

Leaf:-

Internal Vertex:-

m-ary tree.

Ex 3
624

3-ary tree.

Full m-ary tree.

Full-4-ary tree.

Height of a tree.

$H=4$.

Balanced tree:- All ^{leaf} Vertices are at level h or $h-1$.
 $h=$ height of tree.

Theorem 2

P 630. A tree with n Vertices has $n-1$ edges.

Theorem 3: A full m-ary tree with i internal Vertices has
P 630 $n = mi + 1$ Vertices.

Full 5-ary tree.

$i=5$.
 $m=5$

$n = 5 \times 5 + 1 = 26$.

Applications of trees.

1- Binary Search tree.

Ex 4:-
626

[mathematics, physics, geography, zoology,
meteorology, geology, psychology, chemistry].

$$\frac{1+2+3+4+\dots+8}{8} = \frac{36}{8} = 4.5$$

$$1+2+2+3+3+3+3+4 = 21 = 2 \times 10.5$$

Chemistry. Geology. meteorology. ⁴ psychology.

$$\frac{1+2+2+3+3+3+3+4}{8} = \frac{21}{8} = 2.625.$$

2 - Huffman Coding.

A B C D E F
0.08 0.10 0.12 0.15 0.20 0.35

$$\begin{aligned} &= A = 000 &= 3 \times 0.08 = 0.24 \\ &= B = 001 &= 3 \times 0.10 = 0.3 \\ &= C = 100 &= 3 \times 0.12 = 0.36 \\ &= D = 101 &= 3 \times 0.15 = 0.45 \\ &= E = 01 &= 2 \times 0.20 = 0.4 \\ &= F = 11 &= 2 \times 0.35 = 0.7 \end{aligned}$$
